Software Developer with 5 years of experience in backend development, systems integration, and process automation. Specialized in .NET technologies and REST APIs, with experience working on e-commerce and billing platforms, as well as third-party services such as Mercado Libre, Tienda Nube, and Contabilium.

In recent years, I have expanded my skill set to include Data Engineering and Cloud Computing, developing ETL pipelines, data quality processes, and infrastructure on AWS. I focus on building scalable, resilient, and data-driven solutions, combining solid software development fundamentals with modern data engineering practices.

PROFESSIONAL EXPERIENCE

Software developer | Global Assist Group SA

September 2021 - September 2025

- I led the development of a multifunctional access control system for gated communities, improving operational efficiency and the user experience. I reduced manual data entry errors by 60% through automated workflows. Technologies used: C#, ASP.NET, Kendo UI, Telerik, TypeScript, PostgreSQL, GitHub Actions, Postman.
- I developed and deployed two mobile apps (Android/iOS) for workers and security guards using .NET MAUI, improving real-time coordination and reducing response times by 40%. Technologies used: C#, REST APIs, .NET MAUI, PostgreSQL, GitHub Actions, Postman.
- I developed a call management system to track service requests and employee activity, improving service traceability and reducing missed calls by 30%. Technologies used: C#, REST APIs, Angular, Tailwind CSS, PostgreSQL, GitHub Actions, Postman.

Data Engineer | Unistore

October 2025 - Now

- I designed and implemented data pipelines that integrate Tienda Nube, Mercado Libre, Contabilium, and DIGIP.
- I developed a central API using NestJS, Prisma, and PostgreSQL for data normalization and synchronization.
- I implemented ETL processes, automations using CRON jobs, and data quality strategies.
- I designed mechanisms for idempotent synchronization, deduplication, and conflict resolution.
- I deployed cloud infrastructure on AWS (EC2, RDS, VPC) for production environments.

EDUCATION

- Pharmacy and Laboratory Technician - Dr. Bernardo Houssay School No. 4-013, Class of 2008
- Industrial Engineering - University of Mendoza, incomplete (2011–2016)
- Associate Degree in Computer Programming - National Technological University FRM, Class of 2021

COURSES

- Java Programming - Cisco Oracle 2018
- B2 English, Languages, School of Philosophy and Letters, UNCuyo, 2025
- AI Development - BIG School, 2025
- Practical Course on Databases in AWS - Platzi, 2025
- Serverless Framework Course on AWS - Platzi, 2025
- Web Scraping with Python Course - Platzi, 2025

SKILLS

Backend & APIs

- C#, ASP.NET, NestJS, Node.js, REST, GraphQL, TypeScript

Data Engineering & ETL

- Pipelines ETL, CRON jobs, Data Quality, Deduplicación, DRY_RUN
- Integration of external APIs (Tienda Nube, Mercado Libre, Contabilium, DIGIP)

Cloud & DevOps

- AWS (EC2, RDS, VPC, Amplify, CloudFormation)
- Docker, Kubernetes, GitHub Actions, CI/CD, SSL

Databases

- PostgreSQL, MySQL, MongoDB, Prisma ORM, referential integrity

Frontend

- Angular, React, Tailwind CSS, HTML5, CSS3

Tools & Methodologies

- Git, GitHub, Postman, GitLab, Jira
- Agile, Scrum, Data Quality, Bidirectional Deduplication
